Latest rumor around the Motorcity is that there will be a Mustang Bullitt in 2008. For Mustang fans, this is great news. The rumor came from the Romeo engine plant, it was said that Ford was testing 4.6L DOHC engines in Shelby GT500 prototypes.

Here's the specs of the possible 2008 Bullitt

- 2008.5 Bullitt Mustang Preliminary Data:
  - 4.6L DOHC, 400 horsepower naturally aspirated engine.
  - Aluminum block with wet sump oiling system.
  - Steel crankshaft.
  - Ford GT type cylinder heads.
  - Ford GT valve covers with special oil fill adapter on the right valve cover.
  - Special exhaust manifolds.
  - Special intake manifold with the plenum and throttle body located on the back of the intake, much like the original Bullitt.
- It's possible that the Bullitt might have more than just 400hp.
